SUMMARY

Computer Science Major at the University of Texas at Dallas, passionate about software development and Artificial Intelligence. Experienced in coding with Java and Python, with a strong interest in emerging technologies. Actively exploring and learning about new technologies as well as important concepts in the field of computing.

EDUCATION

The University of Texas at Dallas, Richardson, TX , Expected May 2029

Bachelor of Science, Computer Science

- Coursework: Computer Programming, Discrete Math, Linear Algebra, Computer Architecture

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, HTML, JS, CSS, GCP

Databases: SQL, Supabase

PROFESSIONAL EXPERIENCE

Alpha Coders

July 2025 – December 2025

Software Development Intern

- Developing Vertex AI, an application that processes curriculum PDFs to generate questions, evaluate responses, and suggest content improvement for creators.

Xceptional Learning

June 2025 – August 2025

Software Development Intern

- Developed and deployed APIs to support backend functionality, ensuring seamless data flow and integration across the platform using GitHub and Google Cloud Platform (GCP).
- Built an AI-powered model customized for individual users, enabling personalized live therapy sessions tailored to the specific needs of special education students.

ACM Projects

January 2026 – April 2026

Project Developer

- Contributed to frontend development with a focus on improving user experience and navigation for a smoother and more intuitive interface.
- Designed and developed a project mascot to enhance visual identity, personalization, and user engagement within the platform.

ACADEMIC PROJECTS

EduChat - Application Development

September 2025 – November 2025 ·

- Designed wireframes outlining the complete user flow of the application.
- Developed the backend and implemented security features for user data protection.

PERSONAL PROJECTS

Solace - Application Development

January 2026 – Present

- Developed a personalized travel agent app that plans end-to-end trips, recommends destinations, and creates optimized daily itineraries.
- Currently implementing an interactive map extension to visualize locations and routes, while actively testing features for functionality and performance.

Cooksie - Application Development

January 2026 – Present

- Developed a web app that generates recipes based on the pantry ingredients the user inputs.
- Executing a live action feature where the user can cook while talking to Cooksie.
